

## **Specialists in Forensic Chemistry**

An experienced team of forensic scientists with extensive backgrounds in public and private forensic laboratories.

Our own dedicated laboratory to carry out re-assessments or primary examinations.

### **Our specialties include:**

#### **Physical Evidence**

Tool and footwear comparisons (including “feet-in-shoes” comparisons).

#### **Fire Investigation**

We have considerable experience in the investigation of fires, vapour phase explosions and related phenomena.

## **We offer . . . .**

- Scene examinations to determine the origin and cause of a fire or vapour phase explosion.
- Interpretation of burning damage and thermal injuries (e.g. child protection cases).
- Laboratory analysis. Viability of incendiary devices. Burning tests and incident reconstruction.
- Assessment and evaluation of all documentary and photographic evidence.
- "Cold" Case Reviews. Free preliminary assessments.
