

*First Forensic Ltd, 2004 - 2014 "A decade of business fidelity"*

This year First Forensic Ltd celebrates its 10th Anniversary in business.

First Forensic Ltd have worked with over twenty UK police forces, the Crown Prosecution Service (CPS) and the Procurator Fiscal. We have contracts with major law firms, undertaking a vast array of forensic work including criminal defence, insurance and personal injury. Trading Standards have engaged us to investigate products to determine fault and we work with large corporate firms and those involved with civil litigation to establish liability for insurers.

As Francis Bacon once famously said, "Time is the measure of business", we too agree and the success we now enjoy is a direct result of 100% client satisfaction.

*Andrew Wade, Director, says, "In today's climate of 'where there is blame, there is a claim', insurers and other firms are now engaging forensic science to establish the facts of a case. Consequently, many insurers are asking the question, 'Was there really blame, and is there a claim?' before reaching for the company chequebook. At First Forensic Ltd, not only do we recognise best practice, we also implement it. Servicing every client individually is at the heart of what we do. We also recognise that nurturing our clients is equally important, allowing us to realise expectations, and to routinely exceed them."*
